

Logitank Aviation

Complete fuel storage solutions

WWW.LOGITANK.COM.AU

Tanks designed specifically for aviation fuels.

Logitank Aviation LTAV 72 with optional inspection platform. Pump Bay models also available.

Designed and engineered for the safe storage and handling of aviation fuels

LOGITANK manufactures a range of tanks designed specifically for aviation fuels.

The Logitank Aviation range is suitable for airport refuelling, aero clubs, helipad refuelling and privately owned aircraft refuelling ... or any situation where Jet A1 or Avgas are used.

The tanks themselves are a self-bundled design with internal

stainless steel inner tank specifically for storing aviation fuels.

Extra attention has been paid to the internal tank structure to ensure a smooth surface allowing water to be separated from the fuel.

Included amongst the range of features is a floating suction to ensure the fuel being pumped into the aircraft is clean and of the highest quality.

From fill to extraction; Logitank aviation tanks are designed to keep fuel clean and water free.

Every effort has been made to ensure the purity of the fuel through the innovative design features.

Please contact us for more information.

We look forward to helping you get ahead.

Logitank Aviation

Logitank supplies self bunded tanks suitable for the storage of aviation fuels such as Jet Fuel and Avgas*. These are built with a stainless steel inner tank specifically designed for aviation fuels.

Standard features:

- Self bunded double wall design
